ABOUT ME

I am a freelance web developer with strong experience in backend development and modern web technologies, including PHP, JavaScript, Node.js, Express.js, React.js, MongoDB, and MySQL. I specialize in building secure and scalable web applications and RESTful APIs. With practical industry experience, I am eager to share real-world knowledge and help students understand core IT concepts and programming fundamentals in a clear and structured way.

EXPERIENCE

- **Full Stack Developer | Green Home Improvement (June 2025-March 2026)**
 - Contributed in developing responsive web and mobile applications
 - Contributed in developing RESTful APIs used by both website portal and mobile application
 - **Internship, Full Stack Developer**
 - Contributed to the development of the Biophysical Ocean Buoy (BoB).
 - Designed and implemented the 3D model of the Buoy.
-

PROJECTS

- **AceTrack Attendance System (2025)**
 - Contributed to the development of the ACES attendance system.
 - Developed and maintained backend services for web applications using Node.js, Express.js, and PHP.
 - **Philippine Coleopterists Society (2025)**
 - Implemented responsive design using modern frameworks for improved user experience.
 - Developed and maintained both front-end and back-end features to streamline application processes.
-
